Airbus Group / Aeropuertos y Servicios de Mexico as a JV built a training Center in order to train airline aero mexico airline pilots on the site of Mexico Airport

Scope of Service :

- Program phase
- Preliminary design (20 % design effort)
- Technical assistance to airbus during construction phase

The equipment is broken down into four components :

- A reception area for the trainees and management area for the training centre
- A tertiary area with annex areas, to prepare the crews for the Full Flight Simulator (FFS) tests, and classrooms
- The flight simulator area (1 unit), with one possible extension
- Technical facilities to support the full flight simulators and technical facilities for the building, including the technicians' rooms.

These areas are supplemented by outdoor spaces : parking.
